

### Campaign tracker: the story so far

- **Fruit trees planted in April – June 2010 period: 17,402**
- **Total fruit trees planted so far: 133,678**
- **Location: Malawi, Africa**
- **Type of trees:** we are focusing on **Guava** and **Papaya** trees, both of which grow quickly and provide abundant fruit. Guava trees grow in 4-5 years whilst Papaya trees grow in 2-3 years
- In association with our friends at **Ripple Africa**

Leah, Thandiwe  
and Omex at  
Chigwiti  
Afforestation  
Club

### Focus: The Reforestation Project objectives

- **To establish 400 tree nurseries** in 400 chiefs' areas, each producing 10,000-12,000 tree seedlings per year. This will give a total of 4 million trees per year
- **To carry out regular training and monitoring** with all Forest Guards, Traditional Authorities, Chiefs and local Village Development Committees
- **To organise localised education programmes** for all local communities and schools, illustrating the problems of deforestation and how reforestation will lead to conservation and better agricultural practices
- **To set up localised projects to produce and distribute mbaulas** (fuel-efficient wood burning cookers)

Every 10 minutes  
in Malawi, an  
area of forest the  
size of a football  
pitch is being cut  
down
